AesthEdge

PVC Marble Sheet is an advanced decorative material, also known as UV coating board. It is made of high-density fiberboard or medium-density fiberboard as the base material and processed by a UV coating process. UV board has the advantages of wear resistance, pollution resistance, high-temperature resistance, water and moisture resistance, etc., and also has good surface gloss and tactile feel. It is widely used in furniture, cabinets, wardrobes, office furniture, and other fields, providing high-quality choices for interior decoration. The colors of UV boards are rich and diverse, which can meet the decoration requirements of different styles and needs.
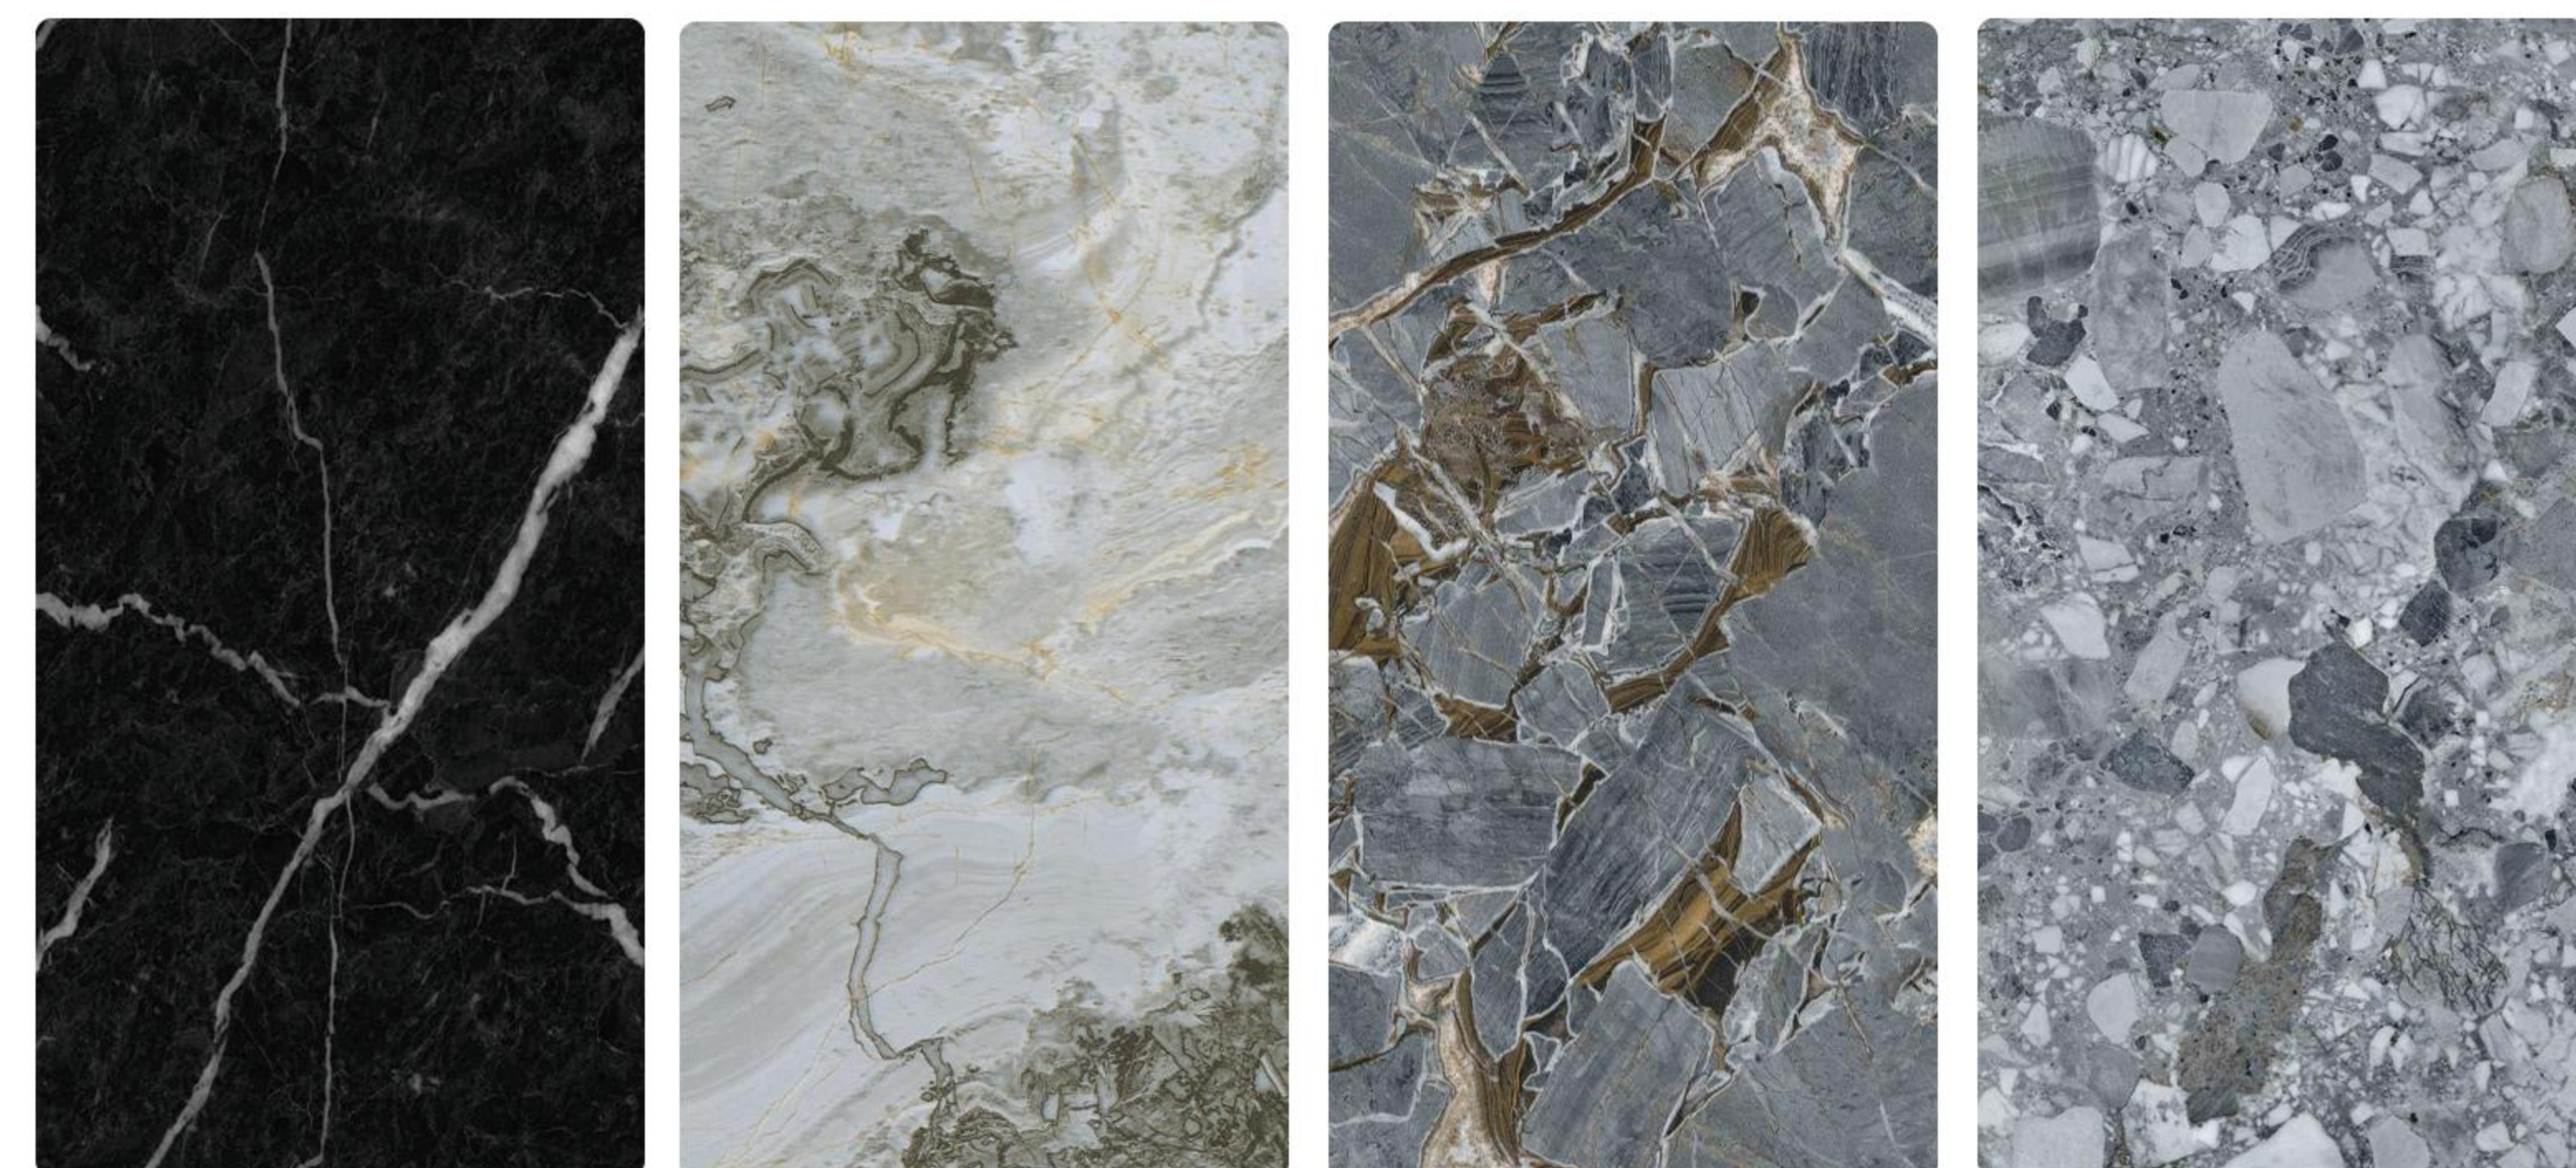

Material	Polyvinyl Chloride/Calcium Powder
Thickness	2.5/2.8/3mm
Size	1220*2440/2800/2900mm
Surface	Hot Stamp/PVC Film/3D Printing

PE protect film
UV coating wear resistant
Heat transfer film
PVC stone base board
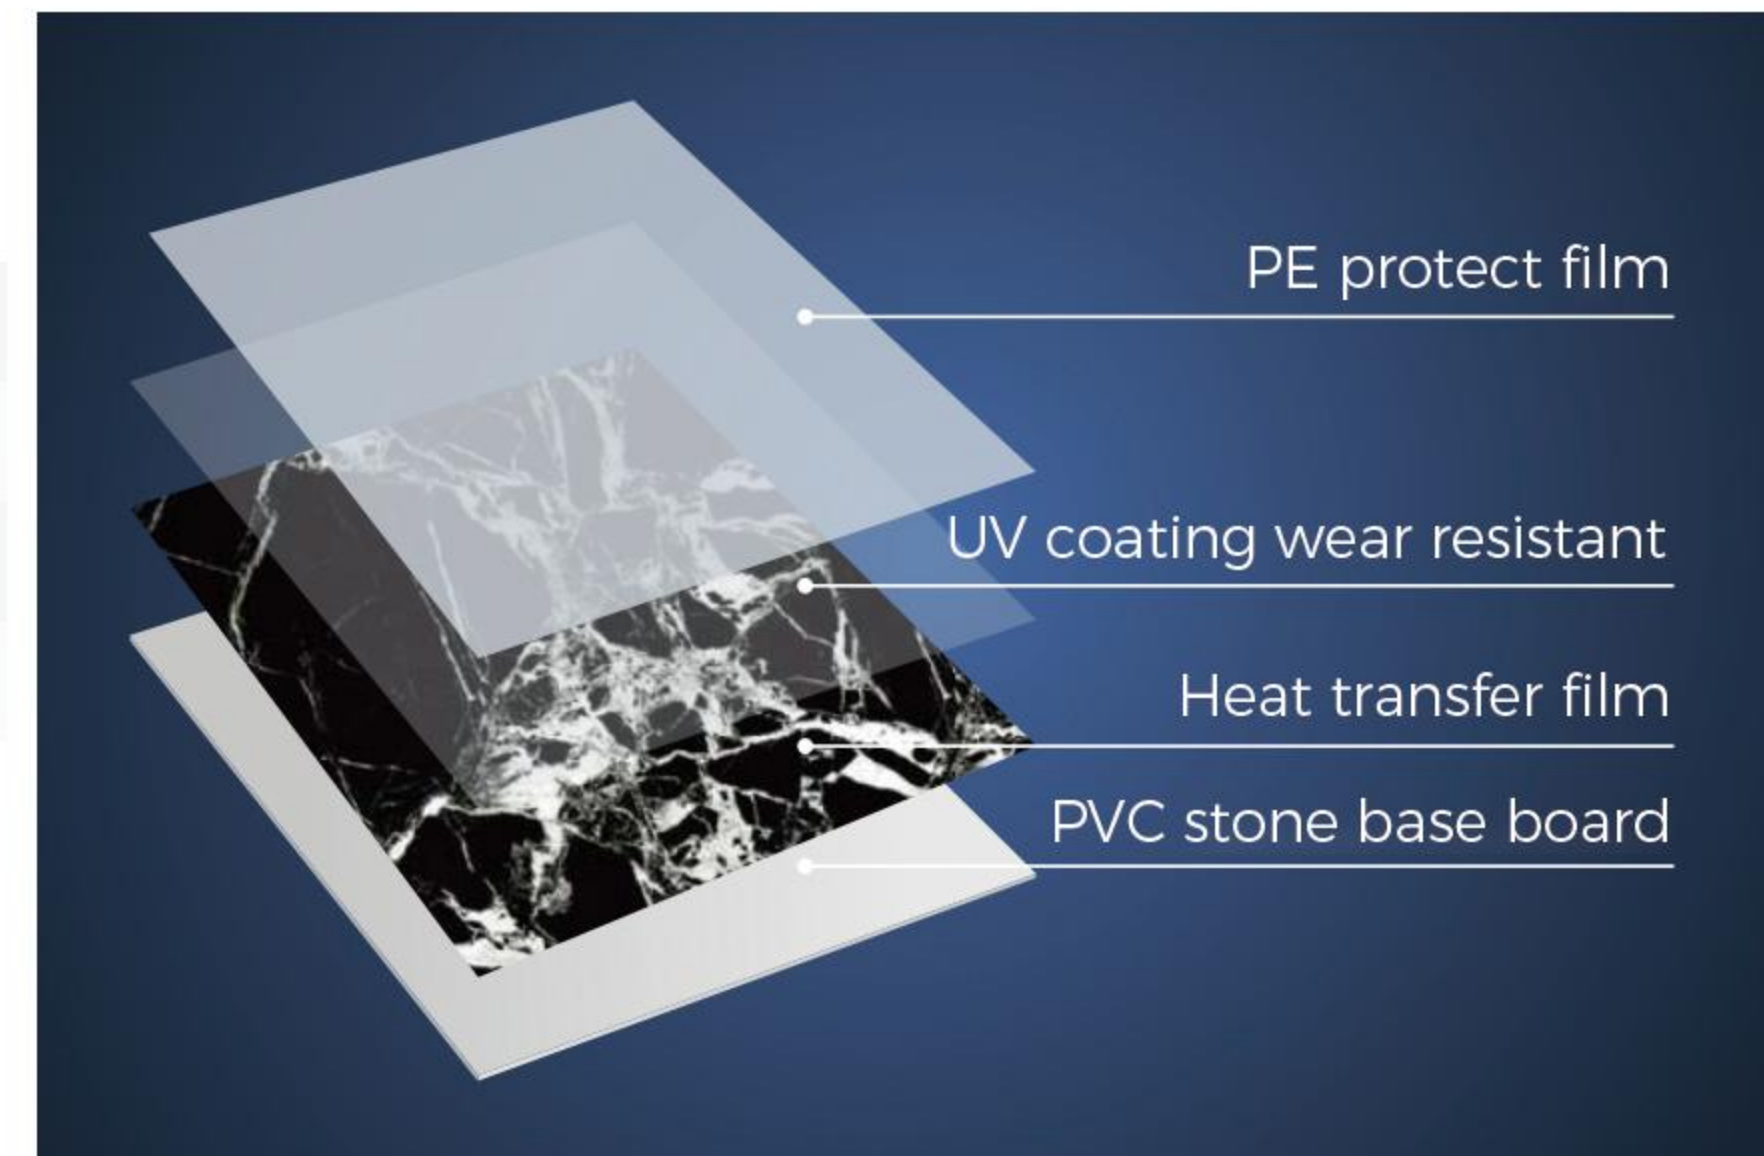

PVC Film
