Aesthedge-A Leading Brand in Decorative Materials, Located in Linyi City, Shandong Province, China, Aesthedge is a premium brand under COMPASSGROUP, specializing in the production, research, and development of innovative decorative materials. Renowned for its durable and stylish Slat Acoustic Panels, Aesthedge has earned both ISO 9001 quality management system certification and CE certification, reflecting our commitment to excellence and global standards.

Our modern production base spans 60,000 square meters and is equipped with advanced machinery and cutting-edge detection facilities. Backed by a team of over 600 skilled professionals, we combine technical expertise with meticulous attention to detail to create products that stand out in quality and design. With a diverse portfolio of more than 1,000 high-quality products, we cater to a wide range of styles and applications.

Slat Acoustic Panels provide an excellent look and improve acoustics by absorbing echoes and reverberations, making the room environment more pleasant. In the use stage, the Slat Acoustic Panels itself will not release harmful substances and can be widely used on walls and ceilings in living rooms, corridors, kitchens, children's rooms, bedrooms, and offices. They are also suitable for public spaces, shops, restaurants, and more.

Finishing oil &
Roller(Optional)

Grab Adhesive
(Optional)

• Methods 2

Screw Installation

Use black screws to attach the backing board to the wall through the polyester acoustic panel. It is recommended to use at least 9 screws per grille panel.

• Installation

• Methods 1

Glue Installation

Directly use construction adhesive or structural adhesive to stick it to the wall.

• Methods 3

Wooden Battens

Directly screw the grille panel into the wooden battens. For optimal sound absorption, use polyester fiber acoustic panels and leave space behind the panels for Rockwool. This combination will achieve better sound absorption.
